Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Election/Restrictions

Applicant's confirmation of the election without traverse of invention I, claims 1-21, in the reply filed on 04 October 2007 is acknowledged. Claims 22-32 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 3, 6, 7 and 9 are rejected under 35 U.S.C. 102(e) as being anticipated by Ogden (US 6,299,645).

Ogden teaches an implant 400 comprising: a load bearing surface, said surface comprising a body portion comprising a recess 408 comprising an undercut 406 and an insert 500 at least partially disposed in said recess 408 and comprising a protrusion 505 at least partially received in said undercut 406; further comprising a mounting feature

410; wherein said body portion comprises a metallic material (lines 2-3 of column 5) and said insert 500 comprises a polymeric material (lines 32-33 of column 6).

Claims 1 and 6 are rejected under 35 U.S.C. 102(e) as being anticipated by Hyde et al. (US 6,599,321).

Hyde et al. teach one embodiment of an implant comprising: an implant body portion 424' comprising at least one annular recess; and an annular insert 402B' disposed in said recess; said implant comprising a load bearing surface, said load bearing surface comprising a portion of said body portion 424' and a portion of said insert 402B'; wherein said body portion 424' comprises a metallic body. Hyde et al. also teach another embodiment of an implant comprising an implant body portion 302 comprising a plurality of recesses 306; and a plurality of inserts 18 disposed in said recesses 306.

Response to Arguments

Applicant's arguments filed 04 October 2007 have been fully considered but they are not persuasive.

The prior art comprises surfaces capable of bearing loads. Moreover, such surfaces comprise a curve. The curve can be considered to be "based on" the curvature of a patient's articular surface, at least because it is generally configured to be suitable for use in a spine and Applicant has not explicitly defined criteria by which a determination can be made as to whether the curvature can be considered to be "based

Art Unit: 3733

on" the patient's articular surface. In addition, the inserts are formed of material that is inherently resilient deformable.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
